## Math Game: Tronix 2

### ✓ What I Practiced

What skills did you practice during the game?

- |   |                                 |
|---|---------------------------------|
| <input type="checkbox"/> Visual problem solving               | <input type="checkbox"/> Other: |
| <input type="checkbox"/> Using trial and error to test ideas  |                                 |
| <input type="checkbox"/> Looking for patterns and connections |                                 |

### ⚙️ How I Solved It

Did you untangle one intersection at a time, or move several points at once?

What did you do when moving one point caused other lines to cross?

### 📌 Next Steps

What was tricky about Tronix 2?

What strategies will help you next time?

- |   |                                 |
|---|---------------------------------|
| <input type="checkbox"/> Spread the lines apart first       | <input type="checkbox"/> Other: |
| <input type="checkbox"/> Focus on fixing one line at a time |                                 |
